

GARDEN CENTRES
BROCHURE 2023

WORLDWIDE STRUCTURES
www.worldwide-structures.com

A temporary structure could help you increase your Garden Centre retail space this Christmas and make the most of seasonal demand!

The benefits of renting a temporary structure:

Make your outdoor space welcoming and functional 'all year round' - not just for a few weeks in summer. Heating and air-conditioning units are easily installed keeping your structure comfortable throughout its use and our structures can be up and fully operational in just a few days.

Why a temporary structure and not a marquee?

Well, you will be surprised when you see one of our temporary structures, which are made from structural aluminium. They could not be further away from a marquee: they will not blow away in the wind, they are incredibly robust and weatherproof.

You choose the size of your structure and the look and feel, whether you want glass or solid panels, double/single swing or sliding doors, and whether you want it as a stand-alone building or integrated to your current establishment.

Although they are temporary, they most certainly have a permanent feel.

Success Case: Hayes Garden World

The Vision

Hayes Garden World is the largest Garden Centre in Cumbria, attracting over a million visitors per year. In the run up to the festive period, they wanted to transform their furniture section into a Christmas shop.

Worldwide Structures were approached by Hayes Garden World to provide a single storey temporary structure to accommodate some of their garden furniture over the Winter months. During the development stage, drawings and images were sent through of the proposed structure and project details finalised.

Upon confirmation of the project, the structural components were prepared and delivered to site. Installation of the building took two days, with minimal disruption to the day-to-day business of the Garden Centre.

Worldwide Structures Ltd Delivered:

A 10m X 10m single storey flat roof structure – taking 2 days to build.

A structure which extended the current footprint seamlessly, included heating and lighting.

A unique space building system that gave us the flexibility and capability to deliver this particular layout of building from our current stock.

Vast experience of designing and delivering semi-permanent structures within the retail industry.

The Results

As a result of relocating the furniture department into a temporary structure, Hayes Garden World saw **an increase in revenue of 110% from 2016.**

Hayes Garden World were so pleased with their decision, **they provisionally booked the same structure for 2018.**

Success Case: Hayes Garden World

The unique Space Building System®

Modular concept

Our unique Space Building System® is built from the ground up. **Benefits of the system include:**

- Hand-held portability to get into difficult, tight spaces
- No need for separate scaffolding on uneven terrain
- Larger floor platforms allow for multiple temporary structures
- Construct up to 4 storeys tall (including a roof terrace)
- Build a temporary structure on top of an existing building
- Build a platform or temporary structure over sand or water
- Kentedge eradicates the requirement for ground penetrating fixings

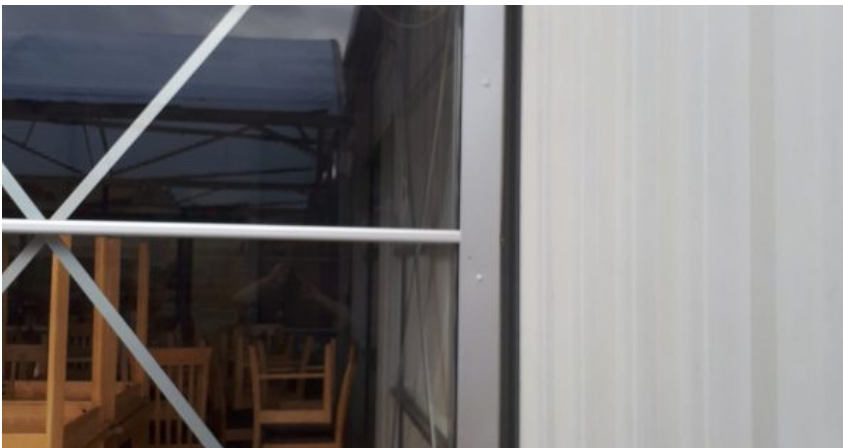

Worldwide Structures Ltd aren't just for Christmas

Whether it's a Santa's Grotto, a new garden furniture section, or extra seating for your café or restaurant, Worldwide Structures Ltd can create a temporary structure that's tailored to your needs and ready-to-use in a matter of days. Check out some of our [Frequently Asked Questions \(FAQs\)](#) below.

What if you don't have a lot of room?

You would honestly be surprised what size of building we can fit into a small space.

Perhaps you have a stunning vista that could be viewed if we were to install a double storey building or roof terrace – maybe a G&T bar on the roof! Our buildings are adaptable to each location, to make the space work for you.

Do you have an obstruction on your patio; a tree, or a lamppost for example?

We would simply build around any difficult objects you may have. We can even build on uneven, difficult ground as the legs on the integral floor of the structure can be altered to keep your building level.

You can alter your structure in line with the season.

Our buildings can be altered to suit the season. For example, you may decide to remove a wall during the summer to allow for some al-fresco dining.

This is no problem; when it gets cooler we can revisit the site to reinstall the wall ahead of Christmas.

Get in touch

If you would like an income versus expenditure comparison, we can do this for you based on the structure size you require.

Just **book in a call** to chat about your ideas.

We look forward to hearing from you!
